## Value Proposition

I work in the gap between AI capability and human adoption. With 24 years across product design, design thinking facilitation, and enterprise innovation, I validate what gets built before it gets built, then help teams scale what works. At Capital Group, that approach took a GenAI tool from a 12-person pilot to 300+ sales associates in under a year. On my own time, I build AI-native products as a citizen developer, including Curate Mind, a live open-source research system on AI strategy and adoption, because staying close to the craft makes me better at the strategy.

---

## AI Product Builds

**Curate Mind** | [curatemind.io](http://curatemind.io)

*AI Research System* | 2026

- Built and shipped Curate Mind ([curatemind.io](http://curatemind.io)), a live AI research system tracking AI strategy, adoption, and enterprise transformation. Distills 178 sources into 1,561 data points and 28 traceable positions across 11 themes, with a grounded Q&A interface that cites evidence inline back to original sources.
  - Designed the full product and system architecture, including claim-to-source evidence lineage, a structured position layer, and version history. Built as a citizen developer using Claude, Codex, and Replit. Open-source methodology published on GitHub.
- 

## Experience

**Capital Group** | Los Angeles, CA

*Venture Architect Lead* | Apr 2022 - Feb 2026

*Design Sprint Consultant* | Feb 2020 - Apr 2022

- Led AI enablement for a GenAI sales meeting prep tool, compressing 3 months of development into 3-4 weeks of validated learnings through user interviews, workflow mapping, and Figma prototyping. Delivered production-ready Figma designs used directly by engineering teams, enabling adoption to scale from a 12-person pilot to 300+ active sales associates within a year.
- Designed and facilitated 20+ Innovation Sprints and cross-functional workshops (30-50 participants) in person and remotely via Miro, translating customer needs into AI use cases and moving teams from ambiguous opportunities to validated assumptions and clear next steps.
- Refined the Google Design Sprint into a 2-week Innovation Sprint methodology, reducing assumption-heavy development cycles and accelerating time-to-validated-learnings across investment, client group, and technology teams.
- Co-authored annual Tech Trends Reports on AI and emerging technologies, authoring 1-2 AI-focused trends per year and serving as editorial lead across 4-8 additional trends, informing 3-5 year planning horizons for senior leaders and enterprise architects.
- Drove AI vendor and platform evaluations by mapping capabilities to use cases against security and compliance requirements, including defining Copilot Studio environment strategy, capability boundaries, and use-case routing to scale the platform effectively.

## **Super by Design** | [superbydesign.io](https://superbydesign.io)

### **Product & Design Strategist** | Jan 2018 - Present

- Facilitated Design Thinking workshops in person and remotely via Miro for startups, nonprofits, and enterprise clients, delivering Figma prototypes used directly by engineering teams as the initial production design foundation.

## **Assured Certificates** | San Diego, CA

### **Product Manager** | Feb 2021 - Apr 2022

### **Product Designer** | Jul 2015 - Nov 2016

- Owned product strategy and roadmap for a certificate management platform used by insurers, brokers, and clients, prioritizing adoption through faster verification, mistake detection, and scalable certificate workflows.
- Aligned product, design, engineering, and operations through backlog refinement, quarterly planning, usability testing, and workflow and data-structure definition.

## **Foster Love** | Brea, CA

### **Product Manager** | Dec 2019 - Jan 2021

- Owned product strategy and day-to-day delivery for Ella (ella.care), a platform supporting foster youth, partnering with engineering and stakeholders to prioritize work and execute through iterative planning.
- Identified and tested new market opportunities within the foster care system through qualitative research, Design Thinking workshops, and rapid prototyping workflows that shortened learning cycles and informed roadmap decisions.

## **Riot Games | Santa Monica, CA**

**Product Designer** | Jan 2016 - Dec 2017

- Facilitated Riot's first Design Sprints and delivered Sketch and InVision prototypes tested with end users, helping internal tool teams move from ambiguous challenges to validated direction and on-time delivery of League of Legends content at scale.
  - Trained engineering teams in customer interviews, discovery, usability testing, and synthesis practices to uncover root pain points, validate solutions, and reduce rework.
- 

## **Earlier Experience**

### **Felt Bicycles | Irvine, CA**

**UX/UI Designer** | Jul 2008 - Sep 2011 – Designed and shipped annual website releases across 160+ products and two brands; improved dealer-facing tools and online ordering experiences. Awards: W3 Gold, IMA Best in Class.

### **Platt College | Los Angeles, CA**

**Instructor, Visual Communications** | Jul 2007 - Jun 2008 – Developed and taught Typography, Web Design, and Portfolio Preparation.

---

## **Education**

**Platt College** | B.A. Visual Communication, 2005

---

## **Facilitator, Speaker, and Mentor**

Co-facilitated, and hosted the Official Design Sprint Bootcamp with John Zeratsky; spoke at, or mentored through Storyteller's Summit, LMU Startup Weekend, UCLA Creative Labs, Organizational Change through UX, and facilitated Design Thinking Principles workshop series in collaboration with LAUX.
